MCC Statement About Disruption in the Middle East

Updated: Mar 3rd, 2026

Recent geopolitical developments in the Middle East have led to an escalation of regional tensions involving Iran, Israel, US, and allied forces.

MCC has completed a supply chain risk assessment in light of these events and does not currently anticipate material disruptions to overall supply in the short term. That said, sustained volatility in energy markets may place upward pressure on costs over time.

We remain committed to closely monitoring the situation and assessing any potential impacts to our operations and customers.

Please contact your MCC Sales Representative for account specific information. We will continue to share updates as new information becomes available.
