Micro Commercial Components 20736 Marilla Street Chatsworth CA 91311 Phone: (818) 701-4933 Fax: (818) 701-4939

Features

- Trench Power MV MOSFET technology
- Low R_{DS(ON)}
- Halogen free available upon request by adding suffix "-HF"
- Epoxy meets UL 94 V-0 flammability rating
- Moisture Sensitivity Level 1

Maximum Ratings @ 25°C Unless Otherwise Specified

ELECTRICAL CHARACTERISTICS(T_a=25°C unless otherwise specified)

Note:

1. The value of R θ JA is measured with the device mounted on 1in2 FR ⁻ 4 board with 2oz. Copper, in a still air environment with TA =25° C. The Power dissipation PDSM is based on R θ JA t \leq 10s and the maximum allowed junction temperature of 150° C. The value in any given application depends on the user's specific board design.

2. The power dissipation PD is based on TJ(MAX)=175° C, using junction - to -

case thermal resistance, and is more useful in setting the upper dissipation limit for cases where additional heatsinking is used.

3. Single pulse width limited by junction temperature TJ(MAX)=175 $^{\circ}\,$ C.

4. The R θ JA is the sum of the thermal impedance from junction to case R θ JC and case to ambient.

5. The static characteristics in Figures 1 to 6 are obtained using <300 s pulses, duty cycle 0.5% max.

6. These curves are based on the junction - to - case thermal impedance which is measured with the device mounted to a large heatsink, assuming a

maximum junction temperature of TJ(MAX)=175° C. The SOA curve provides a single pulse rating.

7. The maximum current rating is package limited.

LIFE SUPPORT

MCC's products are not authorized for use as critical components in life support devices or systems without the express written approval of Micro Commercial Components Corporation.

CUSTOMER AWARENESS

Counterfeiting of semiconductor parts is a growing problem in the industry. Micro Commercial Components (MCC) is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. MCC strongly encourages customers to purchase MCC parts either directly from MCC or from Authorized MCC Distributors who are listed by country on our web page cited below. Products customers buy either from MCC directly or from Authorized MCC Distributors are genuine parts, have full traceability, meet MCC's quality standards for handling and storage. **MCC will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources.** MCC is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.
